

Reader 2

MAKE IT EASIER TO LEARN AND UNDERSTAND

Promotes independent reading and learning for any student suffering from reading difficulties such as dyslexia.

C-Pen Reader 2 is the successor of original C-Pen ReaderPen. C-Pen Reader 2 scans text to have words read aloud with natural speaking voices and defined with highest tier dictionaries instantly. C-PEN Reader 2 also features a voice recorder and supports storing scanned text as well as an app for easy access to word practice. Everything is built-in, and there is no need or requirement for an internet connection.

The digital highlighter – alongside the text-to-speech function – supports multi-sensory learning and aid language retention. You can use the included voice recorder to support learner revisions, and students can record pronunciations or objectives from teachers to develop independent learning.

C-Pen Reader 2 features

- Reads text out aloud
- Easily accessible word definitions
- Audio aided user interface
- Scan and store text, or scan directly to computer (no software required)
- Voice memo recorder
- Fast reading
- Audio boost
- Word practice app
- Up to 5GB user memory
- Speaker and earphone jack
- Rechargeable battery

Scanning pens are essentially digital highlighter or mark-up pens. But takes you one step further. A scanning pen digitizes the printed information and allows it to be processed further which makes it possible to use for multiple purposes. The ones important to us are productivity and learning.
